Object View

Media Display

The Media controls are: play, previous frame, next frame, mute, volume, current position, duration, remaining time, subtitles/captions, audio streams, mark-in chunk start, mark-out and create a new chunk, create a point marker at current position, picture-in-picture and full screen
Chunks and markers display

Chunks Timeline

Chunks and markers have their own properties, activities, views and actions and can also be treated separately. The available actions for them are: Add Bookmark, Attach File(s), Begin Versioning, Change Property, Copy, Delete, Edit, Export, Merge Markers, Pop Out Window, Relate to, Set In, Set Out, Split Marker, Transcode, Download, etc.

Audio display has the same content area and control bars as the video:
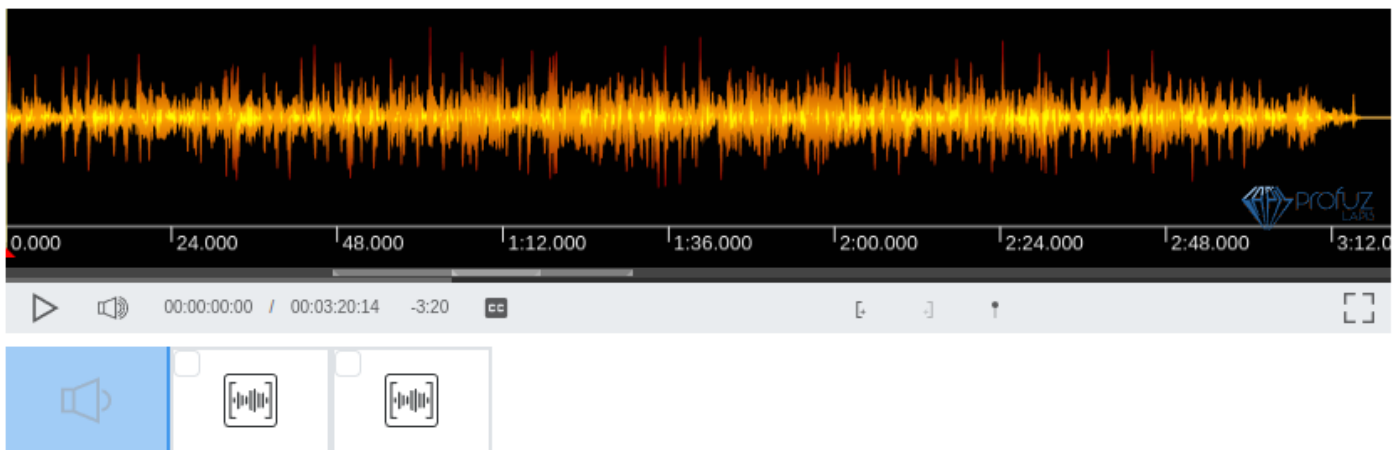

Audio waveform is generated automatically and displayed.

Subtitles viewer and editor looks like this:

1. 00:00:00.028 - 00:00:04.138 (4.110)

Über die Plattformen und die
Internetseite von BNT

2. 00:00:04.271 - 00:00:09.520 (5.248)

Vor einiger Zeit haben wir einen Roboter
entwickelt, der die Nachrichten vorliest.

3. 00:00:09.619 - 00:00:11.641 (2.021)

Tatsächlich haben wir künstliche Intelligenz.

4. 00:00:11.894 - 00:00:15.436 (3.542)

Eigentlich ist das älteste
Fernsehen in Bulgarien BNT das erste,

5. 00:00:15.521 - 00:00:18.827 (3.305)

Subtitles editor provides features for inserting, deleting, merging, splitting, timing, automatically translating and positioning subtitles/captions in SRT and WebVTT formats.

Other content types such as images, documents, excel sheets, presentations can also be opened with the viewer as shown:
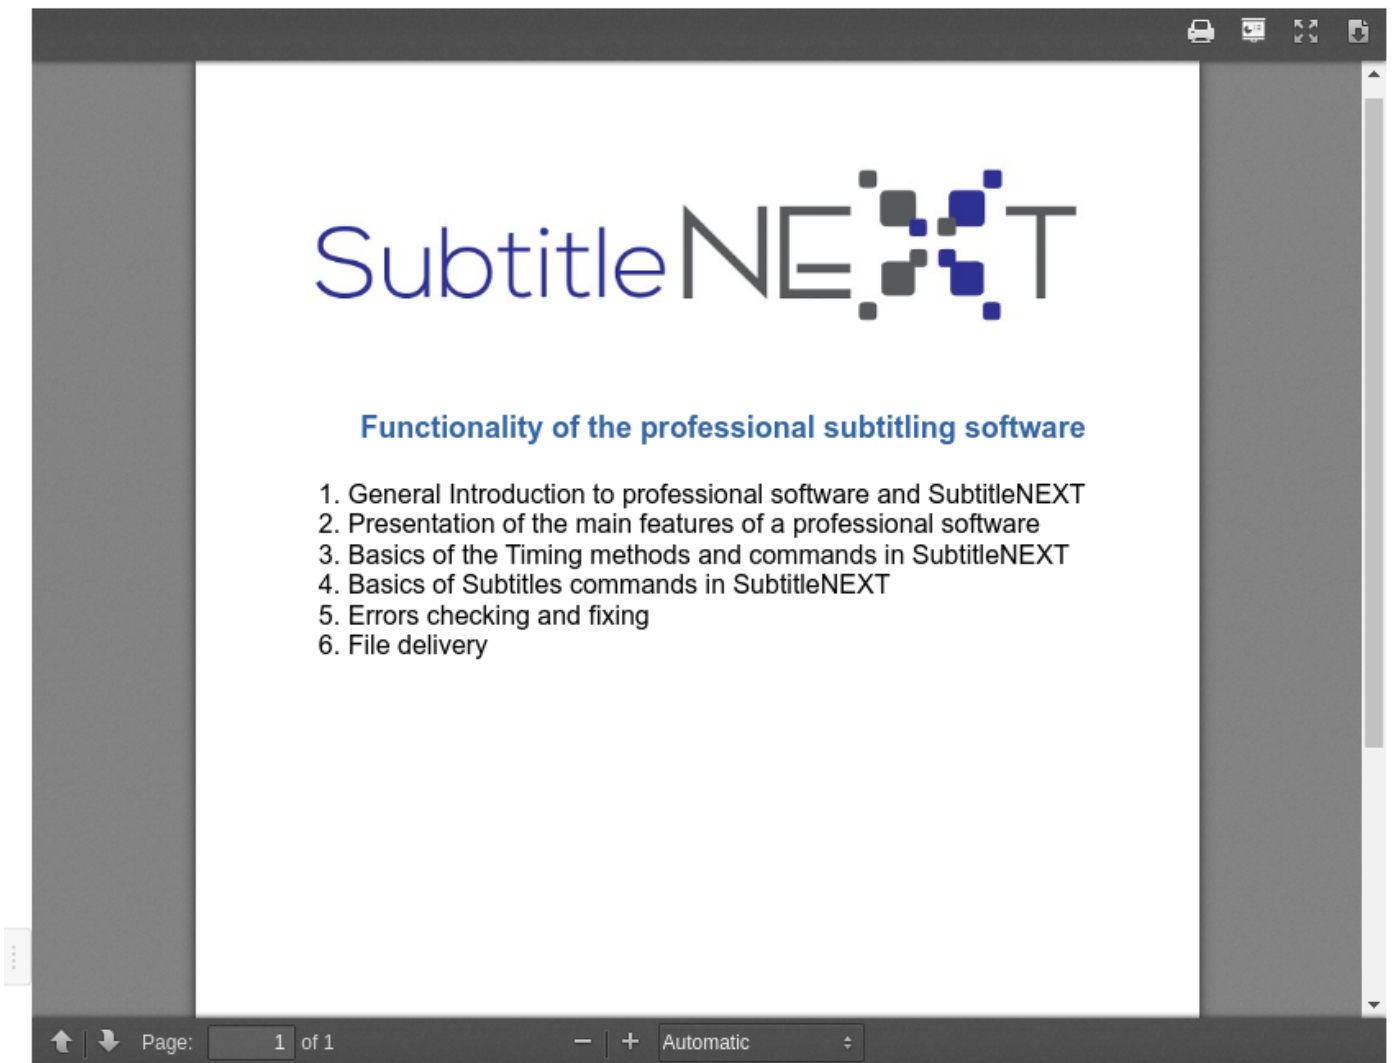

SubtitleNEXT Session at Hellenic.pdf (application/pdf)   (PDFDocument-Stream

Request Approval

SubtitleNEXT

Functionality of the professional subtitling software

1. General Introduction to professional software and SubtitleNEXT
2. Presentation of the main features of a professional software
3. Basics of the Timing methods and commands in SubtitleNEXT
4. Basics of Subtitles commands in SubtitleNEXT
5. Errors checking and fixing
6. File delivery

No results

All contents and transformations have their own IDs, activities, views, properties, relations and actions.

Relations

Relations are used to link information from various types as shown below:

The relations can be in one direction or another. They can also be removed if not needed any longer.

Properties

The properties are the metadata of the file. There are standard default properties and custom properties defined by the system administrator(s). The properties placement can be customized for New, View and Edit screens. For more information about how to create new properties and property placements, please consult the corresponding sections.

Properties have Quick Edit and Save as shown:

They can be localized in multiple languages and the localized versions can be added with the + as shown:
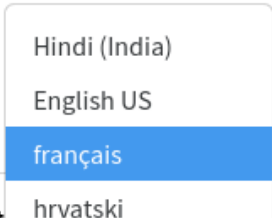

Properties can be of various types such as text, integer, symbol, etc.

Container, tag, category are properties used for categorizing files.

Permissions can be set for an individual object (file) for individual users and user groups by allowing and denying operations as shown:

Related Media Links Sidebar
