Software License Update

Follow these steps to renew or update or apply a new license.

Step 1: Send Us Your License Request

1. Locate the license request file `license-info.licenserequest`. It is usually found in one of these locations:
   - `~/appache-tomcat/` for update
   - `~/` (application's home directory) for new
2. Send us this file together with the **serial number** of your installation.

Step 2: Receive and Place the New License

1. You will receive an active license file named after your serial number, e.g. `ABCDE123456.license`.
2. Place this file in applications's home directory (`~/`).

Step 3: Restart the Application

Restart the application for the new license to take effect:

```
$ sudo systemctl restart tomcat.service
```
